PRICE LIST OF SEEDS FOR 1931
SPY HILL CONSERVATORIES

220 MAIN ST., BEACON, N. Y.

NOTICE—We give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once.

We have adopted the Central System in selling Beans, Corn and Peas, and quote prices by weight instead of measure. One pound equals about one pint.

All prices subject to change without notice.

220 Main Street, Beacon, N. Y.

THE SPY HILL CONSERVATORIES

The Spy Hill Conservatories is named from the hill of that name where the business was first located.

Spy Hill is the historical name of a Hill, located on a bend in the Hudson River, at the foot of Mt. Beacon where the early settlers used to go to look or spy (as they called it) for enemy boats. Spy up the river, spy down the river, from this hill, hence the name, "Spy Hill."

Then if necessary they would light the Beacon fires on Mt. Beacon to signal to the troops for help. North Beacon or South Beacon each had a meaning and they must walk up, no incline to pull them up in seven minutes, as we have now.

At the foot of this hill (Spy Hill) Dr. John Young erected the first small greenhouse and that March came the great blizzard of

1888 and froze everything and he had to begin all over again.

Then after a while more green-houses were built then a store was added, the glass-houses were sold but the store increased in size and ability to please customers, and now a fine store with seeds, flowers, plants, and everything that goes to make a Flower Store attractive is here.

The flowers by especial arrangement with the grower (the party who bought our Green-house) we have fresh flowers every morning, brought to our store direct from the Green-houses, and our long standing in business, has given us a knowledge of just where to buy any flowers we want.

A thorough knowledge of arrangement and a fine eye for color, the making of bouquets, baskets, and all floral designs is an easy matter.

A line of baskets, vases, jardinières, etc., a really fine assortment is carried.

Seeds are also sold and a large

and varied stock of reliable seeds makes this part of the business a great success.

The Florists Telegraph Delivery Association to which we belong makes it very easy to send flowers any where in a few hours, just step in our store and ask to have flowers sent to your friend in San Francisco, Boston, or New Orleans and in a few hours they will receive them, flowers fresh and sweet, with your card. The F. T. D. as it is called is a very fine part of the business.

We also receive orders from all parts of the country, and fill them with the utmost care.

This is just to tell you something about "Our Name," and our business and our ability to fill your orders.

Your Flower Friend always ready to serve you.

Spy Hill Conservatories.

S. L. YOUNG, Proprietor.

Mangel Wurzel, Mammoth Long Red and Golden Tankard, Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb 25c; lb 75c.

Makes Seeds Healthy

The only organic mercury disinfectant that can be used in either dust or liquid form, and requiring such simple (even home-made) equipment and a minimum of skill. Tested and recommended by agricultural colleges and experiment stations, farmers, market gardeners, florists, nurserymen, country clubs and country estate supervisors. The cost? Not more than 1c and often as little as $\frac{1}{4}$ c per lb of seed!
